The amendment filed February 8, 2005 has been entered and made of record as paper no. 0205.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Usami (US-4,879,585, of record).

Usami discloses a semiconductor device comprising a plurality of first semiconductor layers (24-1 and 24-2) formed in a first region of a semiconductor substrate with an insulating film (22-1 and 22-2) interposed between the semiconductor substrate and the plurality of first semiconductor layers and a second semiconductor layer which is a part of the substrate formed in a second region of the semiconductor substrate in which each of the plurality of first semiconductor layers is surrounded by the second semiconductor layer. Note figure 4C of Usami.

In re claim 16, it is well known that the device in Usami can be used in logic circuits, storage element, analog element, and signal input/output circuit. See also figure 5 of Usami. Mere statement of intended use is of no patentable weight in claims drawn to structure. See Ex parte Minks, 169 USPQ 120.

In re claims 17 and 18, the first semiconductor layers in Usami are arranged to be symmetrical with respect to a certain point or certain straight line on the semiconductor substrate.

In re claim 19, the area of second semiconductor layer in Usami is larger than the first semiconductor layers.

In re claim 20, no patentable weight is given to the process of making in claims drawn to device. Note that a "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15 at 17(footnote 3). See also In re Brown, 173 USPQ 685; In re Luck, 177 USPQ 523; In re Fessmann, 180 USPQ 324; In re Avery, 186 USPQ 161; In re Wertheim, 191 USPQ 90 (209 USPQ 554 does not deal with this issue); In re Marosi et al, 218 USPQ 289; and particularly In re Thorpe, 227 USPQ 964, all of which make it clear that it is the patentability of the final product per se which must be determined in a "product by process" claim, and not the patentability of the process, and that an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or not. Note that applicant has the burden of proof in such cases, as the above caselaw makes clear.

Claims 21-23 are allowed.

Applicant's arguments with respect to claims 13 and 16-20 have been considered but are moot in view of the new ground(s) of rejection.
